Average outpatient spending per visit on pharmaceuticals (RMB)	196	298	-34.2%
Total average outpatient spending per visit (RMB)	275	437	-37.1%

Notes:

1. The above total average inpatient spending per bed-day is determined based on the Company's bills for services rendered to patients, including into account differences with medical insurance settlements and the Company's incurred cost for some medical services that are not billable.
2. The considered increases in outpatient visits and significant reduction in expenses compared to the same period last year are primarily due to: i) sale of lower-priced online pharmaceuticals through the Company's internet hospitals; and ii) optimizing the structure of medical services mainly to refer inpatient hospitals.

The above operating performance indicators are based on the Company's records and are not necessarily audited by the Company's auditors. The operating performance indicators may differ from those disclosed in the annual and quarterly reports. The operating performance indicators disclosed in the annual and quarterly reports shall prevail if there is a discrepancy.

Shareholders and potential investors of the Company are reminded to rationally deal with any information not officially released by the Company, and shareholders and potential investors of the Company should exercise caution when dealing in the shares of the Company.
